Our complete software suite can be used for tracking inventory, managing your customers, and much more. Automatically track inventory and customers while maintaining an up-to-date database. Customers can be assigned custom attributes, allowing you to store any relevant information that could be useful for the transactions you have. You can even associate bank accounts and locations with your customers! Use a completely revamped and intuitive back office to manage transactions, view reports, create invoices, and more. You can even setup multiple businesses from a single database! Pay online using either your bank, or allow PetraSell to take care of all transactions and

payments for you. You can also use PetraSell to manage your entire business. Prefer to use paper? No problem! PetraSell allows you to export transactions to either Excel or PDF format. In addition, you can import data from spreadsheet, CSV, and even images for tracking your inventory! PetraSell is fully customizable, allowing you to change nearly every aspect of the program to best fit your needs.

Disqus.Reduction of DAT binding in the
nucleus accumbens, amygdala and
striatum in a rat model of chronic
stress. Chronic stress in rodents leads
to a down-regulation of dopamine
transporter (DAT) in key limbic regions,
including the amygdala, striatum and
nucleus accumbens (NAc). In the
present study, we investigated the

effect of repeated psychosocial stress in the rat on DAT binding in the amygdala, striatum, and NAc. An animal model of chronic stress in the rat, the predator induced stress (PIS) model, was used. Male Long Evans rats were exposed to 2 weeks of PIS, or to a social isolation control condition (S
